

Environmental & Sustainability Policy Statement

Trojan Lighting Solutions Limited (Trojan) recognises its environmental responsibilities and is committed to protecting the environment and preventing pollution, by optimising our processes during the design and manufacturing stages.

Trojan's business is managed through a Business Management System, specifically designed for the company with a scope to provide the ***"Design, Manufacture and Supply of Lighting and Intelligent Lighting Control Systems for Commercial and Industrial Applications"***.

This policy statement confirms Trojan's commitment to continually improve our management systems to enhance our environmental performance.

To achieve this and to create an environmental direction for the company, we have the following aims:

- Manage and conserve energy and resources through our activities.
- Sustainably source and procure materials through an approved supply chain.
- The establishment of energy performance targets.
- Sustainable processes and equipment to reduce extraction, processing, transportation, solid waste, and consumption.
- Comply with our client's procedures in respect of the environment and positively contribute to their Net Zero commitments.
- Create a healthy indoor environment through intelligent lighting solutions, ventilation and thermal comfort, moisture control, and daylighting.
- Minimise waste by promoting prevention as the preferred option, followed by reuse, recycle and repurposing.
- Ensuring waste disposal is compliant with legislation, best practice and industry-relevant standards.
- Minimise CO2 emissions through the careful selection and use of transport and efficient journey planning.

At all times Trojan will meet, or where possible exceed, compliance with applicable legislation, codes of practice and other requirements that relate to company activities.

This policy statement will be briefed to all employees at induction and shall be formally reviewed on an annual basis by directors.
